

A GUIDE TO...
**INTEGRATED
CONTACTLESS PAYMENTS**

GARDIFF
Epos

Contactless has revolutionised how people pay for goods and services.

There were over 3 billion contactless transactions across Europe in the last 12 months and the UK alone has seen a 300% increase in contactless spending.

Consumers have been using contactless to pay for their lunches and lattes with restaurants and bars seeing a massive 150% increase in transactions under £30 using cards, smart phones or other wearable devices.

So make sure you join the contactless revolution with an integrated contactless payment solution that works seamlessly with your Gardiff EPOS system.

I just wanted to say thank you for such a great service. All your staff have been so helpful and the Engineer that came to site was really helpful and nothing was too much trouble.

It's rare today you get such a quality and friendly service so I wanted you to be aware.

A GUIDE TO... INTEGRATED CONTACTLESS PAYMENTS

It's **very easy to transform your EPOS system** to accept contactless card payments.

A quick call to Gardiff EPOS and your system could be up and running accepting contactless payments from your customers in next to no time. Our solution creates a seamless link between your EPOS system and a card payment terminal - which means a more convenient and faster service for your customers.

It's really simple...

The Key Benefits to your business...

Improved Customer Experience

- Contactless means faster transactions
- It's more convenient for your customers
- Increased throughput of customers – shorter queues
- Fewer abandoned sales – quick and convenient
- Increased average transaction value

Cost Reductions for you

- **Improved staff productivity** – less time spent taking payments
- **Reduced cash handling** – fewer errors or visits to the bank
- **Lower cash shrinkage risk** – reduces the risk of theft or fraud
- **Comprehensive reporting** – helps you manage your business efficiently

Risk Reduction

- A full payment audit trail available
- Comprehensive back office transaction reporting
- Assured payment – minimal chargebacks
- Risk managed between card and payment device
